INTRODUCTION

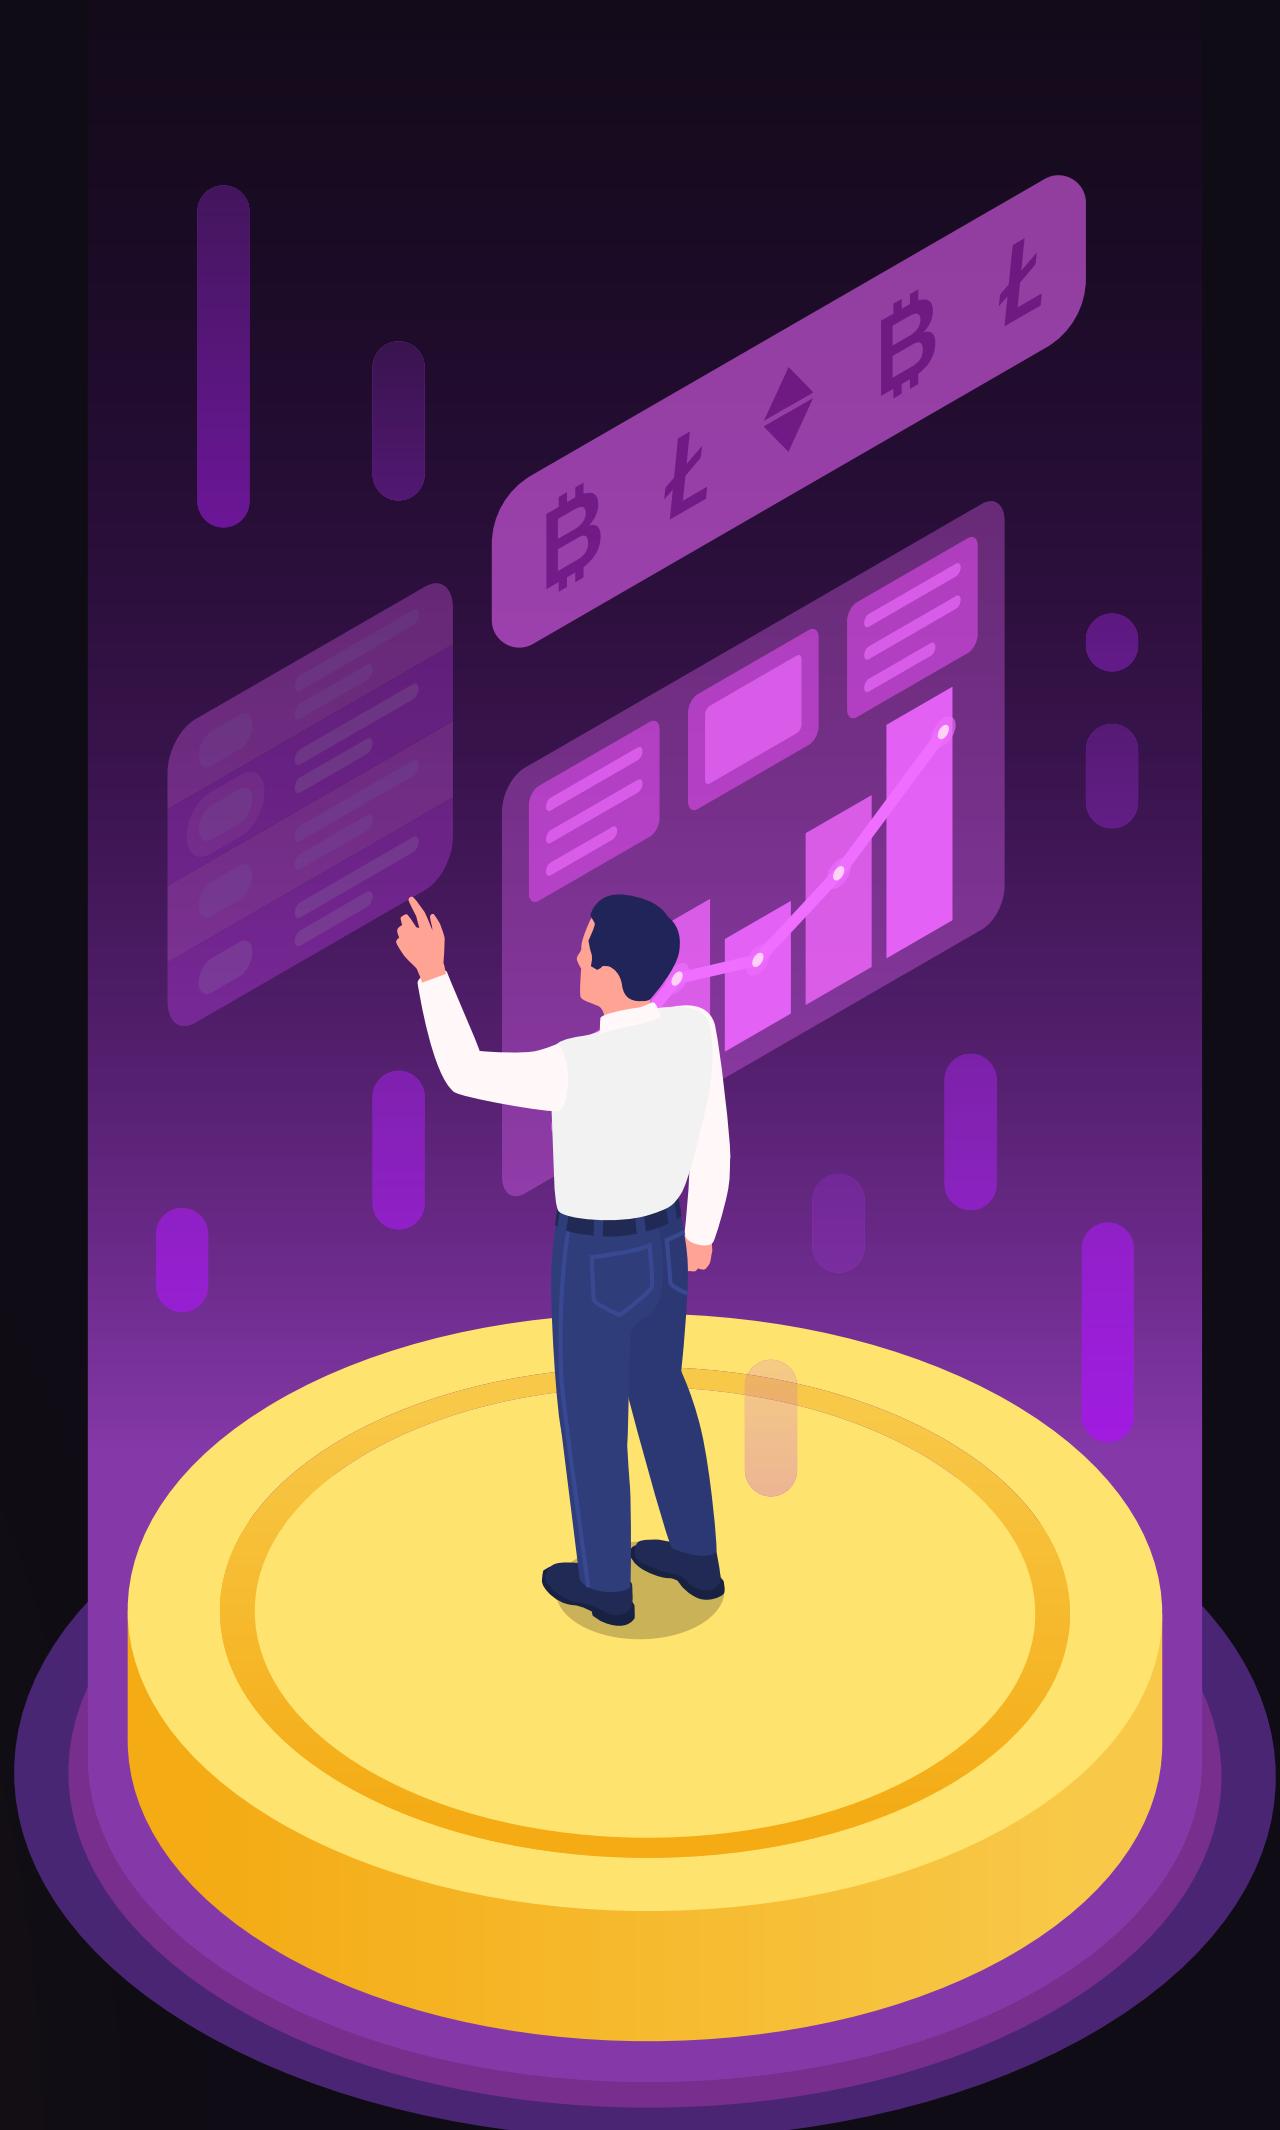

Appleswap.ai is a decentralized derivatives trading protocol. Users can enjoy a smooth trading experience while connecting to Appleswap with just one click through their decentralized wallets.

By using AI Technology, we take pride in being the pioneering cryptocurrency exchange that combines the best of both worlds: a CEX-DEX hybrid platform.

With an extensive range of spot and futures markets, comprehensive trading services, and a thriving Appleswap ecosystem, we are committed to making crypto and blockchain easily accessible to all individuals.

PROBLEM STATEMENT

Challenges faced by traders
in the crypto market

High transaction costs

Dependence on intermediaries

Complex and
unintuitive trading platforms

Lack of privacy and security

SOLUTION

Appleswap as the solution

User-friendly interface
powered by AI technology

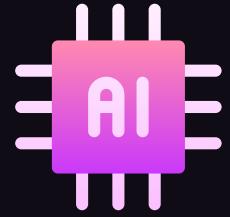

Reduced transaction costs
by eliminating intermediaries

Enhanced privacy and security
through decentralized trading

COMPETITIVE ADVANTAGE

Unique points of Appleswap

AI Technology

Provide users with a secure and seamless trading experience on Appleswap CEX and DEX. Optimizing the transactions and Reducing swap costs.

Reliable System Performance

Rest assured knowing that our system is stable and reliable. We prioritize maintaining a functional platform, ensuring minimal downtime and uninterrupted trading activities.

User-Friendly Interface

Our platform is designed with simplicity in mind, ensuring that everyone, regardless of their background or experience, can easily participate in cryptocurrency trading.

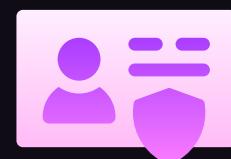

Top-Notch Security Measures

The security of your assets is our utmost priority. We employ robust measures, including two-factor authentication (2FA), to provide a safe environment for storing and trading cryptocurrencies.

24/7 Customer Support

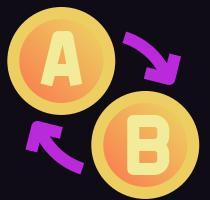

Need assistance? Our dedicated support team is available 24/7. Our highly-trained professionals are committed to resolving any issues or queries promptly, ensuring your satisfaction and peace of mind.

Enhanced Privacy

No sign-up required, connect your personal wallet to start trading.

APPLESWAP PRODUCTS

Swap

Trade with ease using our low-fee and fast transaction interface.

Perpetual

Enjoy fast and seamless futures trading anytime, anywhere.

Staking

Earn passive income and support the blockchain by staking your assets.

Liquidity

Earn interest by providing liquidity to our pools and share in transaction fees.

Farming

Boost your returns with our high-yield farming options in community-run pools.

Top Traders

Get prizes when you are in top traders with the highest trading volume.

TOKENOMICS

AP Token & Contracts

Blockchain Network: BEP-20

Total supply:

100,000,000

Smart Contract:

0x0c59d2Dc24798Ff6869DE428aA931A862C4E9994

Allocation

AP Token Allocation

Presale

30.4878%
Add Liquidity Pool

8.4122%
Staking Pool

0.1%
Airdrop

0%
Founders and DEV Team

Allocation Details

The total supply of AP Tokens is 100,000,000, and no additional tokens can be minted

The fixed supply of tokens can create scarcity and limit the availability of AP Tokens in the market. This has the potential to increase the token's value in the future if there is a higher demand for using and purchasing AP Tokens.

61,000,000 AP tokens were sold during the fair launch phase

Selling tokens during the fair launch stage helps establish an initial user base and attract investor interest. This token quantity can build a community of AP Token users and influence its value and liquidity.

30,487,800 AP Tokens are used for liquidity addition

Utilizing a portion of AP Tokens to provide liquidity to the trading platform can enhance liquidity and increase trading capabilities for users. This can be appealing to investors who want to participate in the market and execute convenient transactions.

8,412,200 AP Tokens are used for the staking pool over a period of 6 months

The staking pool offers investors the opportunity to earn profits by locking and providing AP Tokens. The token quantity used in the staking pool can limit the token supply in the market and create a scarce environment.

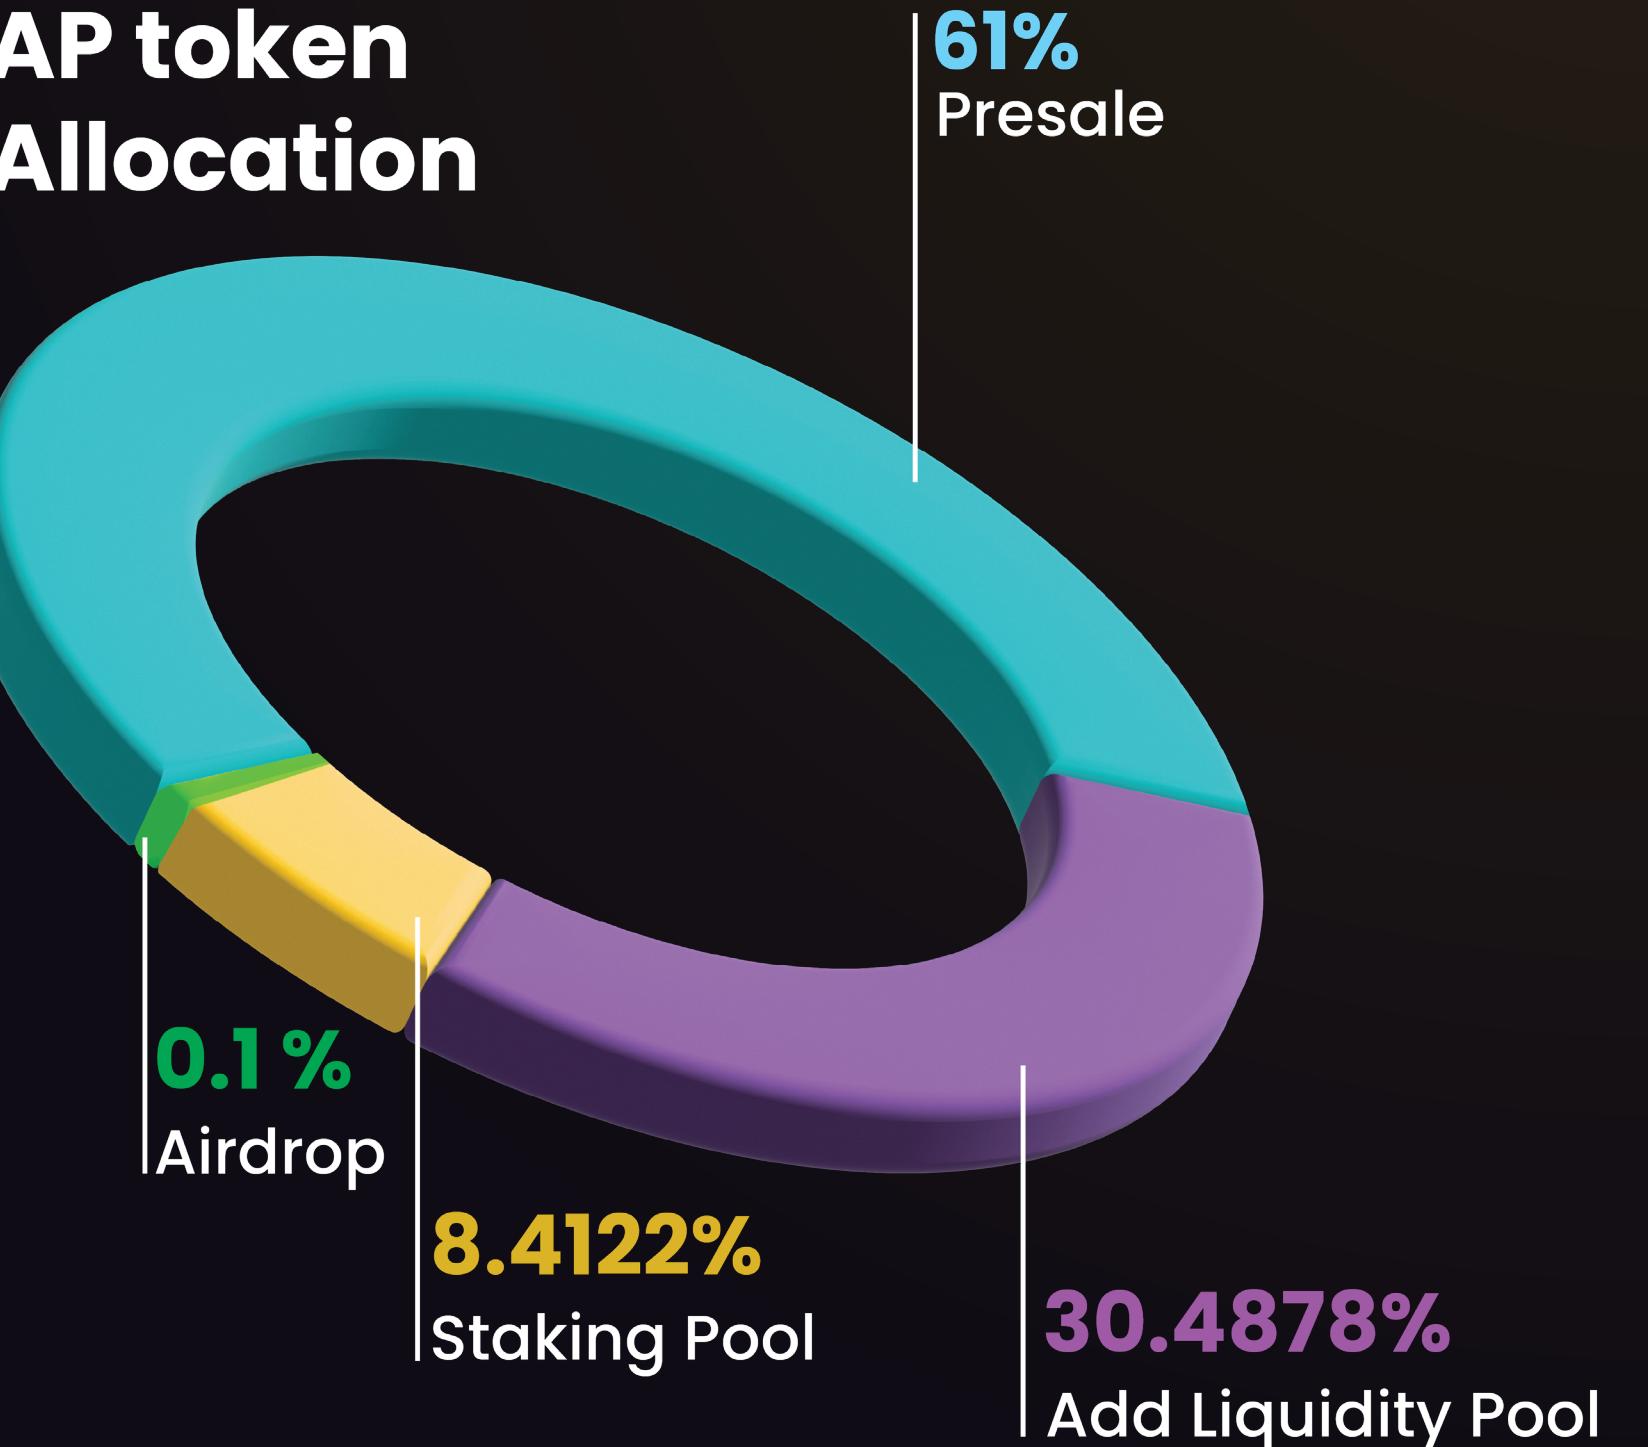

100,000 AP are used for Airdrop

Airdrops involve distributing tokens to develop communities.

◆ The project founders do not hold any AP Tokens ◆

The fact that the founders do not hold AP Tokens can instill trust and transparency within the user community, as there is no potential for them to sell and create selling pressure on the token price.

AP token Allocation

REVENUE MODEL

Profit Generation

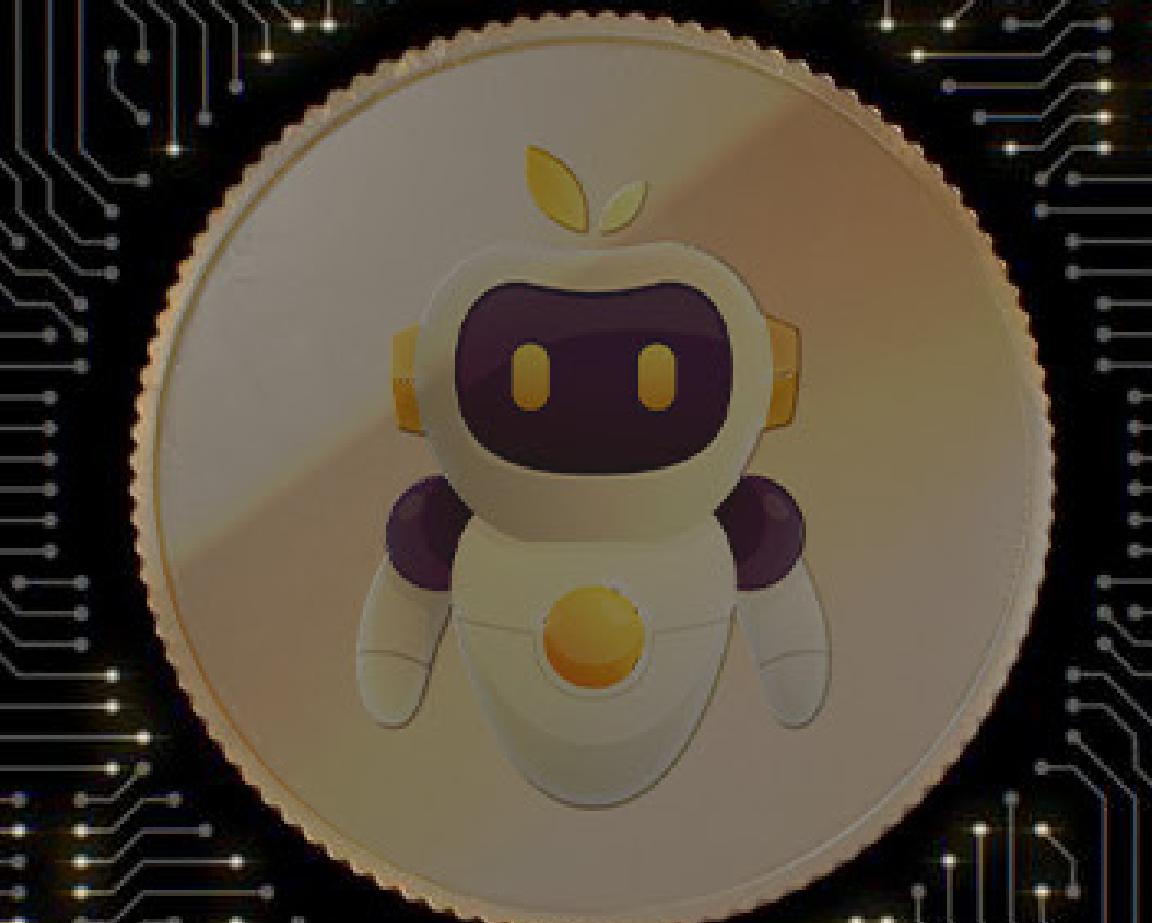

1% fee from transactions on the platform

Liquidity Provision

1% fee from AP Token transactions

◆ Commitment to charity and marketing activities with a percentage of the transaction fee

◆ Commitment to buy back and burn AP Tokens from swap fees for potential price appreciation

ROADMAP

COMMUNITY AND SOCIAL MEDIA

Providing our users with a safe, secure, and easy-to-use platform for all their cryptocurrency needs!
